

Skeletons Found in Car at Elkwater Lake

Bodies of Couple who Disappeared a year ago.

Discovered in an almost inaccessible place in thick brush, almost 300 yards off the main trail in the Cypress Hills at a point approximately three miles from Elkwater Lake, the dead bodies of two persons were found seated in the rear seat of an automobile late Sunday night. The bodies were Monday identified as Adam Schneider, 32, of Irvine, Alberta, a married man with three children, and Mina Sturm, 16, a daughter of Emmanuel Sturm of Medicine Hat. The find brings a year old police hunt throughout the United States and Canada to an end. The couple disappeared on August 24 1929.

Returning home Sunday evening from Elkwater Lake, Ray Palmer, of Fox, accompanied by his wife and brother, Harry, made the gruesome discovery. Taking a short cut over land which he had never traveled before he noticed an automobile in the brush. He looked in the car and on seeing the two skeletons he returned to Elkwater. He telephoned to Sgt. H. Allan A. P. P. officer in Medicine Hat. Sgt. Allan, accompanied by Coroner Dr. O. Boyd, left for the scene and early Monday morning made an investigation.

On a beer bottle wrapper in the dead girl's handwriting was written: "We are happy to be lost."

Coroner Boyd and Sgt. Allan upon examination of the bodies came to the conclusion both had died by taking poison but owing to the advanced stages of decomposition it was impossible to tell what poison had been taken. Coroner Boyd decided the deaths were obviously due to suicide and no inquest will be held.

On August 24, 1929, Schneider drove to the Holstein farm, Irvine, and met Mina Sturm, who was employed there. Both departed that day and although the most rigid search was made, no word was heard until Monday. The dead man leaves his wife and three children.

GETTING READY FOR THE UNEMPLOYMENT SESSION

Hon. G. D. Robertson, Minister of Labor, has called a conference of the employment service Council of Canada to meet next Tuesday for the purpose of discussing the unemployment situation preparatory to special session of parliament.

Premier Bennett and his Cabinet have lost no time making preparations for the carrying out of their pre-election promise regarding unemployment.

"Bud" Taylor, of the Imperial bank staff, was taken suddenly ill Wednesday with an acute attack of appendicitis. He was taken to the Medicine Hat hospital at once and underwent an operation. He is now progressing favorably.

Brick & Coal Team Lose To Kimberley

Put up good fight lose by Only One Goal.

By just one goal the Brick & Coal football team lost out to Kimberley in the Semi final for the Bennett Shield. The game was a good one and it was no walk over for the winners. In the opening period the Bricks appeared to be suffering slightly from stage fright but as the game advanced they tightened up considerably and for the last few minutes of play it looked as though they would equalize any minute.

Kimberley scored two goals in the first half. This had the effect of waking the Bricks up and they started off the second period with a real live attack which they kept up until Lawson scored after 25 minutes. For the balance of the period they tried hard to equalize and although on several occasions they worked well in, their effort were spoiled by the splendid work of the opposing defence.

The Bricks made a splendid showing and townspeople are proud of them. To get into the semi finals is the farthest any team in this district has ever for many a long day, and as most of the team is still young and active they are sure to get further next time if they stick together.

Town Team Loses Chance to Cinch Cup

Play Tie Game with Legion in League.

With two goals against them in the first half the Legion came back strong in the second half in their game with Redcliff town last Thursday evening and before the whistle blew they had equalized. The game ended in a draw 2 all.

In the first half Redcliff put up a good game and the Legion were playing loose. After 20 minutes play Maskell scored one of the nicest goals seen this season. He made a nice shot, followed it up and got the rebound. Eleven minutes later Ernie Podesta scored on a nice shot from the side.

The second half saw a complete reversal of the play. It was hard for the fans to believe they were the same two teams. After 25 minutes of hard pressing the Hat team scored. They continued the attack and a few minutes put in a hot one which Jim Podesta, in his anxiety to save, headed into the net. No hope no chance.

If Redcliff had won this game they would have clinched the League Cup. As it is they are two points up. A win for the Bricks in their next League game will tie the two town teams for the League.

Miss Kathleen Dunnett, of Vancouver, is spending this week town visiting Mrs. Selhorn.

The British dirigible R-100 made a successful voyage home across the Atlantic last week end. She did the 3,287 miles in 56 hours, 20 minutes or an average of 58 miles an hour.

PREMIER R. B. BENNETT who received a royal welcome in his home city of Calgary on his first visit west since becoming Premier of Canada.

Cloud Burst Here Last Monday Noon

Roof of Redcliff Garage Caves in During Storm.

It is some time since Redcliff and district have been visited by such heavy rains as passed over during the past week. Last Monday shortly after noon there was a regular cloud burst accompanied by wind which appeared to be blowing from all directions making the rain look like huge waving curtains. The down pour lasted about half an hour but after ten minutes streams six feet wide and 3 inches deep were pouring down the sides of the streets.

A few minutes after the storm the west end of the roof of the old garage opposite the Review office caved in with part of the side walls. This was no doubt caused by the excessive weight of rain water lying in the hollow of the roof.

Two heavy rains fell again on Tuesday and Wednesday.

The local Legion is now making arrangements for their drum head memorial service which will be held in the cemetery on Sunday afternoon Aug. 31st.

Unique Christening at Banff

was witnessed recently at the Banff Springs Hotel when Miss Banff Rocky Mountain Goat, 24-hour-old Stony Indian presence (name) was christened in the christening tub in the presence of the hotel in the presence of around 50 guests with A. H. Devanish, manager of the hotel, and Mrs. Devanish, acting as godmother. The group showed: Neah Rocky Mountain Goat, father; Mrs. Devanish, holding papers; Mrs. Neah Rocky Mountain Goat, mother.

A ceremony unique in the history of the Canadian Rockies took place at A. H. Devanish.

Here and There

(288) Successful Canadian exhibitors in the International Grains and Hay Show to be held at Chicago, November 30-December 1 will be awarded liberal bonuses in addition to the regular premiums offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway, have also announced offers of special awards for Canadian exhibitors.

That silk are attracted by music seems to be established by the actions of two fine specimens of that animal which strut out of the bush when dancing music at the Banff Springs Hotel every evening. Under the hall room windows they begin to shake their heads and prance around and while the music lasts, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as being of the highest quality. Canada and recently the U.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 40 head of registered white leucos constrained to Montreal to be used in building up the poultry industry of the Orient. The birds came from a poultry farm near Vancouver.

Captain R. W. McMorrey, for the last five years marine superintendent of the Canadian Pacific's fleet of Columbia coast steamships, arrived at Vancouver and prior to that a commander with the Canadian Pacific, trans-Atlantic fleet, has been gazetted in the London Times of July 14 captain in the R.N.R.

The province of Manitoba last month celebrated its sixtieth birthday. When 60 years ago the Red Lake region alone, Manitoba's famous fur trading post, 25,000 people and 600,000 cattle and the prairie dweller instead of returning to the fort or village from his day's work, spends his evenings in his radio-equipped home or makes over good highways to the nearest city.

About a thousand feet of steel concentrated from Field, B.C., as the main line of the Canadian Pacific Railway, were shipped to Banff recently, this being part of a movement of 1,000 tons monthly from a mine which started five months ago and which ships steel concentrated to California.

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway program of construction, maintenance and improvement from coast to coast of the Dominion. The program includes laying of branch lines, re-paving and resurfacing of roads and other buildings. The men in general are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

Redcliff Young Couple Married Last Tuesday

Gray — Johnson

On Tuesday afternoon or this week St. Ambrose church was the scene of a very pretty wedding when Rev. Malcolm Steward, united in the bonds of holy matrimony Miss Mary, youngest daughter of Mr. and Mrs. Harry Johnson of this town and Mr. Alexander Gray, Son of Mr. Wm Gray at the late Mrs. Gray of Vancouver, formerly of Redcliff.

At the appointed hour the bride entered the church with her father to the strains of the wedding march played by Mr. H. J. Cox. The bride was most becomingly dressed in a gown of white satin and tulle in Elizabethan style and carried a shower bouquet of opelia roses and lilies of the valley. Her veil was held in place by a wreath of orange blossoms.

Miss Esther Johnson, sister of the bride acted as bridesmaid and was dressed in a gown of can so mauve satin and tulle with picture hat and shoes in the same shade. Her bouquet was surprise carnations in a soft shade of pink.

The bride's mother wore a georgette dress of beauvais blue with corsage of pink flowers.

The groom was supported by Mr. Clark Jacobson of Medicine Hat.

During the service the choir sang: "The voice that Breathed 'Ye Eden'."

The groom's gift to the bride was a White Watch; to the bridesmaid a cut crystal necklace and to the best man an auto robe.

After the ceremony a reception was held at home of the bride's parents only the immediate relatives and friends being present. Decorations were carried out with a profusion of flowers in various shades of pink and the centre table held the three tier wedding cake.

Mr. & Mrs. Gray will reside in Medicine Hat.

The War Veterans Allowance Act

Art. Wakeup, Provincial Secretary of the Canadian Legion B. E. S. L., in Alberta, announces the benefits of the War Veterans Allowance Act which becomes effective on the 1st of September 1930.

Subject to the provisions of the above Act, allowances are payable to veterans of the Great War (1914-1918) who saw service in actual theatre of war. Men who saw service in Canada or England only are not eligible unless they are pensioned or have received a final payment for a disability of 5 per cent. or more in lieu thereof.

Any prospective applicant in doubt as to the operation of the Act can receive full information from any chartered branch of the Legion in Alberta.

correct sign of spring in summer Canada in the making of the use in the maple tree. This annual harvest is the source of maple sugar and the total value of maple sugar and was \$11,000,000. This money accrues mostly to farmers and the province of Quebec is the leader of the industry in Canada.

Two years ago capital investment in electric power in Canada was about \$100,000,000. Today it is over a billion dollars and total production has increased from 1,000,000 h.p. to 10,000,000 h.p. This is about one-third of possible development.

Progressive Group Rapidly Diminishing

Number in Federal House Now Greatly Reduced.

A review of election results for the past nine years shows that third and fourth parties as groups are rapidly diminishing and the country is getting back more and more to the old system of two principal parties. The only group which has come anywhere near holding its own is the U. F. A. group.

In the election of 1921, 55 progressives and 10 U. F. A. members were elected. In the election of 1925 only 15 Progressive and 9 U. F. A. members were elected. The third test case in the election of 1926, that election many previous Progressive candidates labelled themselves Liberal Progressive, Progressive - Liberals, Independent Progressive etc. Only 11 of them were elected and they sat on the government side of the house with the Liberals. The straight Progressives elected only 9 and the U. F. A. 11.

It remained for the election of last month to seal the fate of the Progressive party. As compared with the 54 members elected in 1921, only two survivors of the Progressive movement were elected to the House of Commons, while the so-called Liberal - Progressives were able to elect three. The most ambitious attempt by Canadian farmers to bring into being a new political party had ended in a failure. Only the Alberta farmers failed to the submerged beneath the tidal wave which swept from coast to coast. The U. F. A. group remained nine strong, the same as in the 1925 election.

Mrs. R. C. Hargrave and family returned Monday from Banff, where they had been spending a few weeks holidays.

The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in its final season of construction, and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighborhood of the new steel trail.

The line past few weeks, half a dozen parties have travelled north on the line to explore promising areas, quite before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel north of Mile 412 this year, unless special arrangements are made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill. But they have been disappointed. In one instance, a man raised an argument here over the fact that an eastern Canadian agent had checked his equipment right through to Churchill, and he had hurriedly to The Pas, only to find that he could not get to the port. Railway officials explained present regulations to the prospectors, and he has to be content to postpone his trip until another season. It is reported in The Pas that efforts will also be made this year to trace down Indian reports that deposits of native silver lie in that great triangle south-east of the Hudson's Bay Railway, bounded by God's River on the east, and Oxford Lake on the south.

Last year a few samples of the beautiful silver were found, and a New York factory man and some Indian companions had found the native silver in the north-western triangle. Excellent, detective work on the part of mining engineers failed to show up the origin of the native silver, and the find—if there has been one—remains undivulged.

For years, Indian lore has hinted of spectacular silver to be found in that 62,000 square miles of territory. This reason may be a climax to the silent drama of centuries and, who knows but what a little Cobalt may spring up in that little explored region south of York Factory on Hudson Bay.

Power Resources Of Manitoba

Claimed That 72 Per Cent. Of Water Power Resources Of Prairie Are Located In Manitoba

The considerable power resources of the Province of Manitoba are estimated at 5,000,000 h.p., of which 308,000 h.p. already are in operation. It is claimed that 72 per cent. of all the water power resources in the Prairie Provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,000,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

More Students In Paris

Latest registration figures of the University of Paris, place the total number of students at 53,980, an increase of 2,500 over the preceding scholastic year. Large outlays must be made for more lecture halls, study rooms and laboratories.

Life (as they return from Paris): "Do you realize what you did?" "Huh?" "No, but I'll admit that it was wrong. What was it?"

New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamp? The electricity company has cut off the current."—Guerin Machine, Milan.

W. N. O. 1849

Setting Pace In Egg-Laying Contest

Rhode Island Red Has Laid Of Seven Points

Records of the Canadian egg-laying contest, at Dominion Experimental Farm, Ottawa, this year, show egg production to be 2.7 per cent. above last year and 3 per cent. higher than in 1928 for the corresponding period. Birds entered appear to be swinging into greater production with the approach of summer, 33 pens having reached or passed the fifty-egg mark during the thirty-second week of the contest. It is interesting to note that of these 33 pens, 21 are White Leghorns.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far, is a Rhode Island Red. Two Barred Rock comes and this leading Rhode Island Red have laid the same number of eggs—14—but a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of seven points over her nearest rival. There is, however, indication that this year's egg-laying contest will show the same gratifying increase in egg production which has been evident each year since the contest was instituted in 1918. Some very fine records are likely to be hung up at the close of the contest.

Will Work On "E. P. Ranch"

Two Lancashire Girls Take Jobs Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific line "Duchess of York" en route to Pekisko, Alberta, where they will start their careers on the "E. P. Ranch."

The two girls, Doris and Muriel Howe, sisters, said, "We do not wish to do out there, but it may be clerical or it may be housework. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales' ranch, engaged us and we are looking forward as much to the new job as we are to seeing our brother, who is coming from England to meet us."

Doris worked in the office of a grocery business in Blackpool, and her younger sister, Muriel, was in the public library at Blackpool.

Fruit Crop Prospects

Prospects For 1929 Crop Are Considered To Be Good

On the fruit crop prospects for 1929, as the fruits are, are encouraging and, however, indicate the possibility of a total crop approximating that of 1929, according to the Dominion Department of Agriculture. The crop of 1928, Cherries, pears, peaches and grapes, all indicate considerable increase over last year ranging from 9 per cent. in the case of cherries to 34 per cent. for pears. Apples promise well and while the total crop is expected to be less than last year, indications point to the yield equal to or slightly better than the average commercial crop for the five-year period 1925-29, estimated at 3,178, 124 barrels.

B.C. Canned Salmon

Importance of Canned Industry In Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1928 amounted in all to 1,213,697 cases of 48 pounds each, indicating the importance of the Pacific Coast salmon industry as a factor in the external trade of Canada. Australian countries continued to be first among the purchasers, with France second and the British Isles third. Thirty different countries were customers of the British Columbia canned salmon exporters last year.

Does Not Indicate Hard Times That the American people are still "tolling along" on rubber tires is evident from the March consumption figures of gasoline for twenty-four states of the Union, which show use of 26,000,000 gallons daily, or 7.1 per cent. more than in the corresponding month of 1929. This does not look as much like "hard times" or decreased purchasing power.

There are upwards of 1,500 post-women delivering mail in various parts of England.

The London city directory contains such names as Gotoh, Mr. White, Oono, Coo and Looney.

CENTER FOR ALPINE CLIMBING

ALPINE CLIMBING—Jasper National Park

Into a country where there are no important peaks still unexplored and even unnamed, we take Alpinists from all over the world for the 1930 annual camp of the Alpine Club of Canada, July 28th to August 10th, in Jasper National Park. Alpine members of the medical profession of England, will be among those at this year's camp. In this vast mountain kingdom, climbers will try their skill in the Malaga Lake region, where such peaks as Mt. Sampson, Mt. Charlton, Mt. Wrentham, Mt. Warren, Mt. Mary Vaux, Mt. Malaga, and Mt. Brazeau—ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid prodigality, the massing of rocks in that distinguishes this region from all others. In the Rockies the folly of comparisons, where beauty is concerned, is always obvious. There are a score of lakes, each different, each, once seen, hold their place in the heart forever. Yet this stands out among them all. Where many of the others are chamber music, Malaga is the great orchestra. The composition forms an picture

Big Building Year

Several Large Building Contracts Are Announced In Saskatchewan

It looks like a big building year in Saskatchewan. A new \$200,000 apartment house and a new \$500,000 technical school are now under construction, while the Dominion Government is spending about \$300,000 on the addition to the grain elevator, also, contracts running to about \$1,000 are involved in extensions (from Saskatoon to Rossville and Outlook in one direction, and to Melfort and Tisdale in another), of the Saskatchewan Power Commission.

New Type Mail Box

Sweden Installing One Which Gives Detailed Information

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster, General Anders. The chart not only tells when the box is serviced, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the volume of mail trains for various parts of Sweden and abroad.

FASHION

PARIS FAVORITES

A cane-valetted crepe silk with lingerie collar and cuffs of crimp organdy reflects the newest idea of Paris in playful skirt treatment.

Diagonal stripes emphasize the smooth at through the neckline, and at same time carries out the lengthened silhouette to give height to the figure.

A leather belt nips the natural waistline. This charming semi-sports frock can be made with 3 1/2 yards of 38-inch material, instead of 36 inches contrasting in the medium size.

Style No. 5133 is designed in 36, 38, 40, 42, 44, 46, 48, 50 and 52 inches bust.

It is strikingly smart with a bysantine blue shade and a wide band of black and white stripes.

Parrot green shantung with eggshell and daisy-like cuffs.

Navy blue wool crepe with white silk piping, pocket flaps, and travel, skirt or spectator sports.

Feathers weight twined in orange-red and blue is long-tractive with natural lines and a cuff.

Wool jersey crepe de chine, men's shirt, long and short, are also appropriate for summer sports wear.

It's simple to make! The bodice is long-tractive and made in one piece. The attached two-piece skirt is made of inverted plaid at waist, adjusting belt, and a full, full skirt.

Price 25 cents in stamps or coin (coin preferred). Address Pattern Department.

High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

New Provincial Park For British Columbia Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plans announced by Premier Pointe. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an immediate cruise of the entire Cameron Lake area. This will be undertaken by the provincial forestry service and a report will be filed with the government before fall.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and the hills which are covered by snow-capped Mount Arrowsmith. It consists of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highway, winding between them, is in twilight on a sunny day.

Women's Institutes

1150 Women's Institutes In The Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of Ontario with a membership of over 40,000. These Institutes exist for promoting social contact, and are beneficial to the community as a whole, especially to women and children, through co-operation effort. The movement started at Stony Creek, Ontario, in 1887, has now become world wide. Women's Institutes, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

Destructive Wheat Disease

Loss Caused By Foot Rot Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-All," or foot rot, is the most destructive, observed the Dominion Botanist of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, not included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the exercise of proper care and the wholehearted support of Western farmers have kept the disease from becoming seriously established in Canada.

When Fate Was Cruel

Income Tax Papers Only Mail Received From Wrecked Steamer

Of 130 mail bags on a steamer wrecked on Stettin only four have been washed ashore, and of these four only one retained its contents in a condition fit for distribution. This was a bag of income tax papers—an instance of that "very" humor for which Scotland is famous. The worst of it is that when the papers are returned the authorities will not be able to distinguish the early marks of the ocean from the tears shed by those by whom the documents were received.

Study Indian Traits

Four French monks, belonging to an organization similar to the Boy Scouts of Canada, though they are college students, arrived recently at Banff, Alberta, where in the Canadian Rockies they will make a study of Indians. For the ethnographical museum of Paris. They are Paul Chaus and Gabriel Rydner, painter, Raymond Gid, naturalist, and Leon Chalk, photographer.

The British Empire

The British Empire occupies about one-quarter of the habitable area of the earth and its population exceeds one-quarter of the estimated number of the human race.

Manitoba Telephone Building

The Manitoba telephone system will commence construction on a 15-story exchange this year which will cost in the neighborhood of \$1,000,000. Tandy stone will be used.

An alert Italian delicatessen dealer built his shop over an old "Café au lait," so that the upstart stream of cold air never to keep his perishable commodities cool.

The high milling quality of Canadian wheat, almost beyond further proof by the Research Department of the Board of Grain Commissioners for Canada, as a result of a series of exciting tests. Those tests show that blending of 20 to 80 per cent. respectively of Canadian flour with weaker flour grown in other countries give bread varying from 1 1/4 to 4 3/4 per cent. more nutrient content than the country's domestic flour will produce. The largest loaf made during the tests was made from all Canadian flour. Samples of Russian, French, Australian, German, Danish, Argentine and other wheats were used in the tests. Flour was milled from the samples obtained and loaves made from the flour and the country's flour was then added and the size of the loaf was increased from 1 1/4 per cent. in the Russian to 2 3/4 per cent. in the Argentine. An increase to 35 per cent. of Canadian wheat made an additional improvement in the size of the loaf.

Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"It is the necessity arises, the government of Canada is to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Malloch, Minister of Trade and Commerce here, in commenting on the tobacco domestic situation. "The Canadian Government is in close touch with the tobacco growing industry," said Hon. Mr. Malloch, "and it is to be expected that Great Britain, has already put the British manufacturer in close touch with Canada. It is expected that a considerable quantity of Canadian tobacco will be shipped to Great Britain this year," he said.

Produces Better Eggs

Poultry Experts Find Large Hen Excels In Production

The larger the hen the better the eggs she lays. This is more than a truism. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year, weighing 25 ounces to the dozen. With each 1/2 pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 206.6 eggs a year, weighing 25.5 ounces to the dozen. This direct relation is of particular interest to farmers keeping poultry flocks.

Ornamental Shrubs

Development Of Hardy Types Of Shrubs and Perennials

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden flowers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

Door Never Locked

"The door of St. Martin's-in-the-Fields, one of London's famous churches, is never locked. For some reason they believe in St. Martin's. The church is open to all, and is a sanctuary for those who are cold and wet, penniless and hungry, as well as a place of worship for all."

Airplanes are being used in battles against insect pests in Peru.

"I was you that you'll have to go, and for looking here."

"Take the gift, so that the upstart stream of cold air never to keep his perishable commodities cool."

"I was you that you'll have to go, and for looking here."

"Take the gift, so that the upstart stream of cold air never to keep his perishable commodities cool."

While the Canadian Chamber of Commerce is completing plans for its official tour of China and Japan, leaving Vancouver October 30, the Japanese Ministry of Commerce is planning a group of Japanese manufacturers and merchants to be in the same port July 25 on board the Empress of Canada for a tour of Canada and the United States.

To remove the prejudices of men, money want to be regarded as their partner and to be rewarded in the merit regardless of sex, is the view of Miss Helen Cleveland, of Toronto, holder of a "man's" job with an internationally known bond house and recently elected president of the 19th annual meeting of this world-wide women's organization. With forty members of that body she is taking the Alaska trip aboard S.S. Princess Louisa.

The greatest living golfer is Bobby Jones and the most enthusiastic golfer in the world is probably the Emperor of Japan, according to Walter Hagen, colorful U. S. golfer. But back about S.S. Empress of Russia after a tour of Australia, Japan and China. Both Hagen and Kirkwood who accompanied him, noted high appreciation of Japanese golf courses.

Major Ian Hay Beth, noted author of "The First Hundred Thousand" and many other plays and novels, arrived recently at Quebec aboard S.S. Empress of France for a four week sojourn in the Dominion where he hopes to fish and do nothing, although I may pick up an idea for a play or something, for one is always on the look out for likely material.

"Land of Heart's Return" is the description of New Brunswick by Samuel Hetch in his Tourist Topics column in the New York American, because it "always turns out to be nicer in reality than anybody said it was on paper."

A million dollar contract has been offered the Torbanite Products Ltd., of New Glasgow, for Torbanite residues as it comes from the steel re-rolls. This order comprises 250,000 tons at \$4 a ton and becomes effective sixty days from July 5.

Nova Scotia fisheries in 1929 had a product valued at \$11,465,491 according to a report issued by the Dominion Bureau of Statistics. Value of the preceding year's catch was placed at \$12,044,583.

Prospects are that Canada will this year advance into second place among the gold-producing countries of the world. South Africa holds first place and United States, second. Last year the value of gold produced in Canada was approximately \$40,000,000. This year it is expected to be about \$40,000,000.

A short course for departmental judges was held recently at the Ontario Agricultural College at Guelph. Over 125 were present, including judges of ploughing matches, standing field crops, heavy and light horses, beef and dairy cattle, and sheep and swine. Classes were started some 15 years ago, and are primarily to get judges together for purposes of demonstration so that a uniform standard may be maintained for judging at shows and competitions.

W. B. Maclean, vice-president in charge of traffic, Canadian Pacific Railway, since 1916, has 45 years' service with the company, retiring May 31 at his own request, and will be succeeded by George Bluphen, at present freight traffic manager. In announcing the change, E. W. Healy, chairman and president of the railway, said: "Mr. Maclean has been in the company's service for forty-five years and has discharged his duties as freight traffic manager and as vice-president in charge of traffic with conspicuous ability and loyalty to the company's interests. By his retirement the company loses one of its ablest and most respected officers."

More than four hundred varieties of apples have been originated at the Canadian Government Central Experimental Farm at Ottawa within the last 25 years. A large number of seedlings have fruited, the apples have been tested and the best of them named and perpetuated for future production.

Five years ago the total output of petroleum in Alberta was 14,644 barrels; last year it rose to 292,162 barrels, of which 281,231 barrels came from the Peace River Valley, the comparatively new field about 55 miles south-west of Calgary.

Contracts for 65 miles of extensions to the Northern Alberta Railway which run north of Edmonton through the Peace River district, have been let. These extensions are to cost \$2,500,000.

WORLD HAPPENINGS
BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present tribulations into days of peace and contentment.

Official figures on unemployment showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,493 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, died. Sir Joseph, who was known as "the grand old man of New Zealand," was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest, at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada, competed. David Wolf, Washington, D.C., was first.

Marriages at famous Decca Green, Del. elopers have in Scotland are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quil D'Orsay has submitted the name of Andre Henry, who is French minister to Spain, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Klug, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

Plans To Visit The Moon

Scientist Has Perfected Model Of A Rocket That Will Make Trip

At Hoot, a little making place on the coast, Professor Orin has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gun it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

Boost For Alberta

Five Thousand Samples Of Alberta Wheat Sent To American Visitors

By way of an appropriate "boost" for Alberta, Hon. George Hoadley, Minister of Agriculture for the province, sent off 5,000 samples of Alberta wheat to American visitors to the recent Shriners convention in Toronto. It was pointed out that Alberta has carried off the world's wheat championship at the annual International Exposition at Chicago, four times during the past seven years, the honor going last year to Joseph H. Smith, of Wolf Creek.

Building Permits

Building permits issued by city in Canada during May of this year were valued at \$10,621,302. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$65,267,966.

A bird's eye is protected by three eyelids.

Another peace note. Italy will build twenty more warships.

J. A. Chamberlain, of Toronto, was a close second to Parquharban in the individual total, winning a first and second in the indoor events to add to the second-place points which he had won in the outdoor contests. He was for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

A Canadian Cuke

During the past few years there has been such a marked increase in the use of cukes for domestic purposes in Canada that this food has fair to become a serious rival of asparagus, which has long been regarded as the standard food for this purpose, at least in the provinces of Ontario and Quebec.

Will Explore Arctic Regions

Youthful Scientists To Spend Year

Fifteen youthful explorers, whose average age is only 23 years, sailed from London recently aboard the exploration ship "Quest" for the exploration of the arctic regions. Their work will be done on the ice-covered stretches of Greenland and Iceland. The purpose of the voyage, which is under the auspices of the Royal Geographical Society, is to obtain information with a view to establishing an air route from England to North America across the Arctic regions, with only 200 miles over the sea. H. C. Watkins, 23-year-old explorer, is leader of the expedition. His fourteen companions are all about the same age, and each is a specialist.

Watkins made a scientific exploration of Labrador last year, and, of Spitzbergen the year before. The expedition will establish a base on the south-eastern coast of Greenland and a station on top of the ice cap, 8,000 feet above sea level. From there they will make notes on meteorological conditions in connection with flying. The hold of the "Quest" was packed with a year's food supply, including six tons of food for the dogs, which will be picked up at the Furoe station. Two airplanes, two speed boats, sledges and several delicate meteorological instruments furnished by the government were included in the equipment.

A pampered passenger is a young turkey who is doomed to be served for the explorers' Christmas dinner. Reports here said that if the data gathered prove the feasibility of the air route, a test flight will be made and Canada will be asked to make a similar survey on the western side of the American continent.

Scotland's War Memorial

Not Even the Humblest Worker Has Been Forgotten

No one seems to be forgotten in Scotland's wonderful war memorial which is built on the Rock of Edinburgh.

There it stands glowing with the carved and colored legends of every Scottish regiment that served in the Great War. While in bronze figures of stately soldiers, sailors, soldiers, army men, chaplains, nurses, and other workers are depicted. Every class and estate has its memorial.

Carved on the walls are the words, "Remember the name of the humblest that served and died." Then come medallions framing the heads of a horse, a mule, a camel, a message dog, and other animals, with a group of carrier pigeons and a group of marines and mice inscribed. "The humblest friends," because these little creatures are used underground, where their swift collapse when the air becomes poisonous is a warning to men.

Not even the humblest worker has been forgotten by the magnificent men who planned the building. In the shrine is a block of marble set on the rock which rises through the floor, and on this block is a tablet given by the King and Queen enclosing books containing the names of every Scotch soldier who fell in the war. It is a place of pilgrimage to Scotsmen all over the world, this holy place where the noblest heroes and the humblest creatures are all remembered together.

Vancouver Boy Wins

Trip To England

Selected As Best All Around Canadian Model Aircraft Builder

Ross Parquharban, 16, of Vancouver, was selected as the best all-around Canadian model aircraft builder at the close of the national championships held at Ottawa. His victory, in both indoor and outdoor events, added to his second and third places in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

J. A. Chamberlain, of Toronto, was a close second to Parquharban in the individual total, winning a first and second in the indoor events to add to the second-place points which he had won in the outdoor contests. He had a total of 15 points.

A Canadian Cuke

The price long has been an enthusiastic aviator and is reported to be an expert pilot, although for reasons of state he is never permitted to make solo flights. He always accompanies on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on ground or difficult landing fields.

Montreal Has Grown Rapidly

Is Now Fifth Largest City On the Continent

New cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 425,000; today there are 600,000. The city proper, in 1914 there were 353 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$10,500,000, is now \$38,700,000. Montreal has increased the rate of the fifth largest city on the continent.

Kept Appointment

Four Men Keep Try Started 31 Years Ago

Keeping a try started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Handley, MacDonald, G. Clifton, E. Hite, Brown and Edwards, were notified that the studio in which they worked was to be read. They then made a way to meet once a year. This year only MacDonald, MacDonald, Clifton and Hite were able to attend, but the other two sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision at a committee session, such conventions will be followed to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

Legislative Wheat Pooling

In accordance with the decision of the Delegates of the Saskatchewan Wheat Pool at the recent semi-annual meeting, a referendum will be taken among pool members on the question of legislative pooling. Ballots will be mailed from head offices not later than August 1, and each contact signer is being asked to register a vote on the question.

A Remarkable Record

Seven Hundred London Firms In Business For Century Or More

It will be a surprise to Londoners to learn that their great city boasts no fewer than seven hundred firms that have been in business for one hundred years or more. When we consider how easily business change hands, how they fall into decay through change of fashion or the coming of new inventions, how families die out and how the younger generation force over the ugly weeds of fresh woods and pastures new, it is a remarkable and praiseworthy record of industrial enterprise.

Although we may be inconstant in many things, we stand loyally by our prejudices.

The British Broadcasting Service will attempt to broadcast the roar of Niagara Falls.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Lewes, Sussex, by Robert Knecht, a German, who is reported to be the world's champion glider pilot. It consisted chiefly of a demonstration as to how to operate the glider, and it was understood the prince did not actually pilot the machine.

The prince long has been an enthusiastic aviator and is reported to be an expert pilot, although for reasons of state he is never permitted to make solo flights. He always accompanies on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on ground or difficult landing fields.

Slaves To Convention

Droster Says Average Man Wears Too Much Clothing

Dr. Eugene L. Plisk, of the Life Extension Institute of America, lately gave strong support to the theory that the average man who walks the streets of a twentieth century city is "grossly over-clothed."

At this time of the year, such a theory goes far to prove itself. Nonetheless Dr. Plisk's collection of data is worth looking into. He had an examination made at the institute of the clothing worn by two dozen men and women. It was found that in mild weather the average woman wears about two pounds and a half of clothes, including shoes, and that the shoes of the average man alone weighed as much as that.

Completely clad, the average man wore eight and a half pounds of clothing. On any hot summer day he walked the hot asphalt streets with more than three times the weight of the average woman's valise on his back. Dr. Plisk called for reforms, and looked hopefully to England, where last summer a pioneer spirit started a movement to rationalize men's clothing.

Alberta's New Emblem

Wild Rose Is Made Symbol By Legislation

Today the wild rose is official floral emblem of Alberta. Legislation naming the new symbol went into effect with the soft-petalled flower at the height of its season dotting miles of the West. The rose has been the 25-year-old province of the foothills has hitherto owned mountain-peaks, of white and golden wheat fields as its symbol; the new acquisition is considered as harmonious as it is appropriate.

Ten Thousand Mile Trip

Veteran Investigator Of Sub-Arctic Plans Long Journey

Ten thousand miles of travelling in the untraversed stretches of the Northwest Territories is the prospect ahead of W. H. D. Hoare, veteran investigator of the sub-Arctic for the Dominion Department of the Interior. He plans one year of wandering through 1,500-square-mile Thelon game preserve, situated between Great Slave Lake and Hudson Bay.

Railway Passes In The Rockies

The map sheets of the Interprovincial Boundary between Alberta and British Columbia published by the Topographical Survey, Department of the Interior, show the three passes of the Rocky Mountains through which railways have been constructed. Crow's Nest Pass has an elevation of 4,453 feet, Kicking Horse Pass 5,320 feet, and Yoho Pass 5,711 feet.

English Students For Canada

Hamilton Pyre, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as American and South African are Rhodes scholars at Oxford.

China, home of the silk-worm, is now importing artificial silk.

It takes eight large eggs, or nine small eggs, to make a pound.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within The Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Haining.

"Urgent measures for the promotion of inter-Imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. The nations hope for an ultimate extension of free trade worldwide, we believe the immediate step is to secure reciprocal trade agreements for British goods in the British Empire. As a condition of such agreements, however, British must retain an open market for all Empire products while being permitted to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The project is to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway termini and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing concrete tunnels is \$120,000,000 per annum, while the railways have estimated at \$300,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

Eighteenth Century Newspapers

The first newspaper in Quebec appeared in 1764 when the "Quebec Gazette" was founded. The "Royal Gazette" and "New Brunswick Advertiser" appeared at St. John in 1786, and the first paper in what was then Upper Canada appeared in 1793 at Niagara (then Newark), under the name of the "Niagara Gazette and American Oracle."

China, home of the silk-worm, is now importing artificial silk.

It takes eight large eggs, or nine small eggs, to make a pound.

CHAPTER XX—Continued.

"Since the hair itself appears to have been dipped in star dust, it is not noticeable."

"You are a bass fatterer," declared Charmin, and turned away, thereby transforming what had been "the gold bar of heaven" into a plain New England window sill.

But the doctor liked his fancy, and Grandma, who had become accustomed to the appellation, merely smiled. Then her face sobered, and she replied: "You've noticed it too, sonny?"

He nodded, saying thoughtfully: "Something's gone on of late. For lack of a better word we'll call it pep. She seems on edge. Last night I ventured to ask her how she felt, and—she took my head off!"

He grinned at the memory, while Grandma chuckled at his admitted: "Sometimes she gets that way. Charmin's a good girl, but she's no saint, and I'm glad of it. She's human like all the Davines. I'll tell you what's the matter, Doctor, but you mustn't ever let on I spoke of it. It's Jimmy Bennett."

John Carter didn't suspect that Grandma's wise old eyes were watching to see how this would strike him. His head lifted suddenly, as if her words surprised him, and he echoed: "Bennett! You mean—"

"I don't mean anything of the sort," she interrupted. "All I mean is that before Jim went away Charmin did something that hurt his feelings. She misjudged him; and when she found out her mistake she felt just terribly. So she wrote him a letter. I don't, what she said, but it took two stanzas so she must have said considerable. That was all of a month ago, and he's never answered."

For two weeks she hadn't mentioned a word about it, but you can depend upon it, that's just what's ailing her now."

John Carter looked thoughtfully into space until Grandma gently reminded him that his lunch was getting cold. He seemed to pull himself back from somewhere at her words, and said: "Letters sometimes go astray. Grandma. Didn't she hear from him at Christmas?"

"Only a card. Not—not what you'd call a real affectionate card, though."

The doctor leaned back, though his eyes still looked troubled.

"I bet there's some explanation," he insisted as he resumed his seat. "I don't think Bennett liked me particularly, but it struck me that he'd a darned nice way of saying he didn't knock the chip off his shoulder."

"Jimmy's the old of the earth," said Grandma hoarsely.

"And he's in love with Charmin," added the doctor.

"Always has been," said the old lady, "and in my opinion the only

reason she's not in love with him is because he's always been too close. She's never had a chance to get away, well, a sort of bird's-eye view of him, so to speak, and what a splendid view it is. She's used to him, and she's used to the kitchen range and the front door, and I'll say for Jim that he's been every bit as close to her as they have! I miss him like anything."

"From all appearances I should say that your granddaughter misses him, too," ventured John Carter, as he scanned Grandma's empty plate and proceeded to bring the desert that Charmin had prepared. "Are you sure the letter was addressed properly?"

"That's my one hope," said Grandma, brightening. "Lizzie Baker was in yesterday and said she had a card from Sarah Bennett a week ago, and they were somewhere on a trip. All three of 'em. I told Charmin, and it seemed to me she was more cheerful for a while. This is a good pie, isn't it? Charmin picked up early and made it before breakfast."

"She's no business to do such things," declared John Carter. "She's been too deep. Look at her, Grandma, does it make things harder for her—my being here?"

"No, no, no. Maybe she gets a little more food ready for tonight; but it's an awful comfort having you look after the furnace, sonny, to say nothing of the times you drive in to speak to me. Charmin said just yesterday that she didn't see how she could keep the school without you being here. Don't you get fretting over that. Take another piece of pie, sonny. I'll please Charmin to think you liked it. She's a real good cook, isn't she? She says if the school were to close for the next year she'd get a job at the hotel!"

"When she does," retorted the doctor, "he'll be helping himself to a second good slice of pie. I'll take mine there!"

"You needn't bother to wash the dishes," said Grandma, when the luncheon over, the young man started to clear the table. "Some way it'll be the right to me for you to pay for a meal and then clear up after you. You leave 'em be."

The doctor threw her smile, but continued to stare at him, explaining as he filled the dish with hot water: "You forget the restaurant rule at which I eat. It was the contract that I clean up when I had time; and so far as I know I can't do it. I'm in the line of prospect for this afternoon."

"Maybe if Ezra brings Jim's letter you can leave it at the school as you go," suggested Grandma.

"Sure!" he replied with cheer, "I meant to time things so I could stop for Charmin on the way back. I think she's grown thin on the exercise she takes of peddling—at least, she's been so busy with the book I'll run in from the office before I start, Grandma, and see if the letter's here."

Thank you, Ezra comes early in the afternoon. It's real good of him to come at all. We aren't on his route, being right in town. I wish he'd come here to see me. I'll freeze stiff if you put it out today."

"Well," murmured the old lady to herself, when John Carter had escorted her back to her place by the window and gone out to his office, "I don't quite want to make of that young man. He looks the least, the least, when I told him Jim Bennett was what was worrying Charmin; but after that one minute he was as natural as life, and he didn't seem to mind when I asked him to carry her Jim's letter if it came today. I can't tell what he's really trying to do, and square to Jimmy, or—"

Grandma stopped abruptly, peering into the window, and then said: "Here comes Lizzie Baker. She's got on her udder, and her old milk run is coming. I'll be by again, and that Mrs. Merry knit her for a Christmas gift. I'm sick to death of her since the mother got into it and she's a piece out of the back. I hope she's got wearing it when she comes. My Mary gave her a card, she'd as soon think of leaving it home after the first of November, as she would of leaving her false teeth. I'm coming. Hello, Lizzie! What's up today?"

"I wish the mercury was up," replied Lizzie, as she dragged the fur onto the table and began to unwind the scarf. "It's only six above today, and what'll be by sunset the Lord knows. I wanted to run in this morning, Grandma, but I didn't have time. I'm glad to see you. My bread in the oven. Lizzie Moore's party come over and made me burn it. I forgot all about it, she said. She said she'd been having words with the deacon and wanted to let off steam. My never was one to keep her affairs private. Seems that Edgar wants to sell her house over to South

reason she's not in love with him is because he's always been too close. She's never had a chance to get away, well, a sort of bird's-eye view of him, so to speak, and what a splendid view it is. She's used to him, and she's used to the kitchen range and the front door, and I'll say for Jim that he's been every bit as close to her as they have! I miss him like anything."

"From all appearances I should say that your granddaughter misses him, too," ventured John Carter, as he scanned Grandma's empty plate and proceeded to bring the desert that Charmin had prepared. "Are you sure the letter was addressed properly?"

"That's my one hope," said Grandma, brightening. "Lizzie Baker was in yesterday and said she had a card from Sarah Bennett a week ago, and they were somewhere on a trip. All three of 'em. I told Charmin, and it seemed to me she was more cheerful for a while. This is a good pie, isn't it? Charmin picked up early and made it before breakfast."

"She's no business to do such things," declared John Carter. "She's been too deep. Look at her, Grandma, does it make things harder for her—my being here?"

"No, no, no. Maybe she gets a little more food ready for tonight; but it's an awful comfort having you look after the furnace, sonny, to say nothing of the times you drive in to speak to me. Charmin said just yesterday that she didn't see how she could keep the school without you being here. Don't you get fretting over that. Take another piece of pie, sonny. I'll please Charmin to think you liked it. She's a real good cook, isn't she? She says if the school were to close for the next year she'd get a job at the hotel!"

"When she does," retorted the doctor, "he'll be helping himself to a second good slice of pie. I'll take mine there!"

"You needn't bother to wash the dishes," said Grandma, when the luncheon over, the young man started to clear the table. "Some way it'll be the right to me for you to pay for a meal and then clear up after you. You leave 'em be."

The doctor threw her smile, but continued to stare at him, explaining as he filled the dish with hot water: "You forget the restaurant rule at which I eat. It was the contract that I clean up when I had time; and so far as I know I can't do it. I'm in the line of prospect for this afternoon."

"Maybe if Ezra brings Jim's letter you can leave it at the school as you go," suggested Grandma.

"Sure!" he replied with cheer, "I meant to time things so I could stop for Charmin on the way back. I think she's grown thin on the exercise she takes of peddling—at least, she's been so busy with the book I'll run in from the office before I start, Grandma, and see if the letter's here."

Thank you, Ezra comes early in the afternoon. It's real good of him to come at all. We aren't on his route, being right in town. I wish he'd come here to see me. I'll freeze stiff if you put it out today."

"Well," murmured the old lady to herself, when John Carter had escorted her back to her place by the window and gone out to his office, "I don't quite want to make of that young man. He looks the least, the least, when I told him Jim Bennett was what was worrying Charmin; but after that one minute he was as natural as life, and he didn't seem to mind when I asked him to carry her Jim's letter if it came today. I can't tell what he's really trying to do, and square to Jimmy, or—"

Grandma stopped abruptly, peering into the window, and then said: "Here comes Lizzie Baker. She's got on her udder, and her old milk run is coming. I'll be by again, and that Mrs. Merry knit her for a Christmas gift. I'm sick to death of her since the mother got into it and she's a piece out of the back. I hope she's got wearing it when she comes. My Mary gave her a card, she'd as soon think of leaving it home after the first of November, as she would of leaving her false teeth. I'm coming.
